

Jake Gaylor

I make good teams ship like great ones.

15+ years across SaaS, AI, infrastructure, and IoT, with a core of delivery: finding what slows a team down, rebuilding it into tools the whole team uses, and putting real metrics in place so decisions stop being guesses. Lately deep in AI: autonomous agents at Cloaked, the framework behind Block Party's internal coding bots, and Ravi, a funded agent-native SaaS.

Work

Co-Founder

Jan 2026 – May 2026 · 4 mos

Ravi

Cofounded an agent-native SaaS that lets AI agents manage their own accounts and secrets.

- Raised a \$400K pre-seed from South Park Commons
- Grew to hundreds of users
- Shipped the product end to end: a web SaaS and a cross-platform Flutter mobile app on the Apple App Store, built on prototypes started in 2024
- Designed agent-native account, secret, and 2FA management so AI agents can operate their own identities

Staff Software Engineer

May 2025 – Jan 2026 · 8 mos

Block Party (acquired by DeleteMe)

Built internal AI and developer tooling for the engineering org, including the framework behind the company's internal coding bots, until Block Party was acquired by DeleteMe in January 2026.

- Designed and built the framework behind the company's internal AI coding bots

Staff Platform Engineer → Staff Product Engineer

Sep 2022 – May 2025 · 2 yrs 8 mos

Cloaked Inc

Started in platform engineering (AWS EKS migration, GitOps CI/CD, compliance), then moved into product, building autonomous AI agents and a cross-functional ideation portal that drove a sticky, AI-powered onboarding experience.

- Built a GitOps-based CI/CD pipeline that accelerated deployments by 30x
- Led the migration from legacy PaaS to AWS EKS, with a multi-account model meeting SOC2, ISO 27001, and 27701 compliance
- Built an end-to-end product-analytics stack that enabled data-driven decisions across the company
- Built autonomous AI agents with LangChain to automate user account management (auto change password, login, and email)
- Turned those AI agents into a core fundraising narrative and a sticky, AI-powered onboarding experience that boosted adoption and retention
- Launched a cross-functional ideation portal connecting design, product, engineering, and executives with transparent status tracking

Owner / Co-GM

Oct 2021 – Jan 2024 · 2 yrs 3 mos

The Onward Store Steakhouse

Owned and managed a full-service steakhouse with 7 staff, generating \$500K in annual revenue and overseeing P&L, operations, and vendor relations.

- Led a team of 7 employees, handling recruitment, training, scheduling, and performance management.
- Directed all facets of business operations, achieving \$500K in annual revenue through strategic inventory management and cost control.
- Designed and implemented operational processes for facility maintenance, vendor partnerships, and quality assurance, driving consistent customer satisfaction.
- Managed P&L, budgets, and financial reporting, optimizing expenses and improving profit margins.
- Executed marketing and community engagement initiatives to increase local brand awareness and repeat patronage.

Staff SWE in Developer Experience

Jun 2020 – Jun 2022 · 2 yrs

Inception Health

Architected AWS CDK infrastructure and tooling for HIPAA-compliant patient care microservices

- Led delivery of AWS CDK infrastructure for patient care microservices platform, ensuring HIPAA compliance and deep AWS integration
- Collaborated with AWS and partner teams to integrate managed services and accelerate platform development
- Championed CDK usage across application tiers, designing IaC patterns for teams to consume and interact with the platform
- Implemented CI/CD pipelines for mobile apps, automating TestFlight and App Store releases through Git, enabling self-serve deployments
- Trained and mentored product and mobile development teams on CDK, serverless architectures, and CI/CD workflows, fostering autonomy

Senior Platform Engineer

Dec 2018 – Jun 2020 · 1 yr 6 mos

CyberGRX (now ProcessUnity)

Led cloud-native CI/CD vision and implementation for AWS and Kubernetes

- Led vision on cloud-native CI/CD pipelines for AWS and Kubernetes
- Developed custom resource using CoreOS operator SDK for orchestrating blue/green deployments
- Redesigned build and deploy process that dramatically improved team productivity
- Mentored software engineers in best practices for building and deploying software
- Grew into Staff Engineer role by owning large-scope initiatives, collaborating with the Tech Lead to drive interactions across the organization and unblock progress

Senior Cloud Platform Engineer

Jan 2018 – Dec 2018 · 11 mos

Cardfree

Managed large-scale PCI-compliant C# installation in AWS

- Managed a large-scale PCI-compliant C# installation in AWS
- Architected hybrid AMI build and deploy platform using Packer and Vagrant, enabling consistent Windows and Linux EC2 deployments for C# and Ruby services
- Standardized infrastructure-as-code practices to pave the way for open-source .NET migration
- Developed and launched a structured PCI-compliant incident response program, replacing ad-hoc Slack alerts with a streamlined IR workflow without excessive paperwork

Senior DevOps Engineer

Aug 2016 – Jan 2018 · 1 yr 5 mos

Protectwise, Inc (Acquired by Verizon)

Operated SRE for petabyte-scale data ingestion platform

- Managed SRE for massive scale data ingestion platform with thousands of Cassandra nodes and petabytes in S3
- Administered \$10M+/yr production AWS environment using Infrastructure as Code

DevOps Engineer

Jun 2015 – Mar 2016 · 9 mos

Food Service Warehouse

Built Kubernetes clusters on vSphere using CoreOS technologies

- Implemented Kubernetes clusters on vSphere using CoreOS, fleet, etcd, and flannel
- Accelerated release cycles for Node.js services with container orchestration

Software Developer

Jun 2010 – Jun 2014 · 4 yrs

Mississippi State University

Created grant proposals and custom software for research initiatives

- Created grant proposals to fund custom software for university research initiatives
- Developed software for tracking 'human sensors' through natural disasters including Hurricane Sandy

Skills

AI Engineering

LangChain Crewai Custom Agent Framework
MCP Servers LLM Integration

CI/CD & DevOps

GitOps ArgoCD Argo Workflows Jenkins
Github Actions Gitlab CI Continuous Deployment

Databases

Neo4j PostgreSQL Timestream MongoDB Redis
Etcd Zookeeper Cassandra DynamoDB

Monitoring

Prometheus CloudWatch Sensu Pagerduty
Logstash Kibana Grafana Graphite

Product & Business

Roadmapping Customer Discovery P&L Management
Go-to-Market Strategy Fundraising

Cloud Infrastructure

AWS Kubernetes EKS GKE vSphere Terraform
Infrastructure as Code Cloudflare

Programming Languages

Javascript Python Bash Go Ruby Dart

Distributed Systems

Kafka RabbitMQ AWS IoT Big Data Spark EMR

Product Engineering

Data-driven Iteration Feature Development
User Feedback Loops MVP Development
Product Analytics

Languages: English (native speaker)
